

BATTERY OPERATED PEDESTRIAN TUGS

We represent MasterMover Ltd, a UK-based world leader in the design and manufacture of innovative battery-operated electric tugs and material handling solutions. With over 25 years of engineering excellence, MasterMover enables the safe, efficient, and effortless movement of heavy, large, or unconventional wheeled loads across industrial manufacturing, logistics, and retail environments.

Their comprehensive product range spans compact pedestrian-operated tugs to advanced remote-controlled systems and fully autonomous AGV solutions, including specialist MultiLink™ technology that allows a single operator to synchronously control multiple electric tugs attached to one load. Engineered for reliability and trusted by world-leading organizations globally, MasterMover's solutions eliminate manual handling, enhance safety, and transform load-moving operations with cutting-edge technology and tailored solutions.
